

1. Open JIRA using your Login credentials
2. Go to <https://treasuryxpress.atlassian.net/projects>

3. Select SCRUM Project
4. From Board menu on the left select "User Acceptance Testing"

5. You will be redirected to a new board “User Acceptance Testing” as per below (This board is linked to Technical SCRUM board).

6. Three Phases are available
- Awaiting Testing → Case with Status Done in the SCRUM Development Board is automatically transferred here.
 - Once the case is tested successfully from your end, it should be moved to Testing Passed, and in case of failure to Testing Failed
 - QA Team will pick up the failed cases and coordinate with Business and Technical teams for further clarity and inquiries.

NOTE: Ticket in Awaiting Testing will still be deployed on production environment, so kindly make sure to validate all your priority cases prior to the public deployment.
